Wide Format Color Printer

DEVELOPED FOR THE GEOPHYSICAL AND GEOLOGICAL INDUSTRIES, the iTerra IJ1800 is a full color wide format printer. It was created specifically for plotting various widths of color well logs, geological logs and seismic data. The printer can also accommodate other data and file types within Windows applications.

PERFORMANCE

The iTerra IJ1800 prints on a variety of media widths up to 18" wide. The larger media widths combined with vibrant color enables users to analyze data in more detail. The printer is simple to use and cost effective.

Some of the iTerra IJ1800 printer features are:

- Print speed up to 0.64" per second
- Print resolution of 300 x 300 dpi
- Continuous plotting of up to 300 feet using fanfold paper via rear load slot
- Multi-copy printing
- The 3 most popular types of connectivity (Centronics®, USB and Network) are built right into the iTerra IJ1800. This makes printer set-up quick and flexible
- The IJ1800 has monitor software that assists with controlling and viewing some of the printer functions
- The top of form mark always registers at the beginning of a new plot

Qualified Media and Consumables

Using iSys qualified media and consumables in iSys printers ensures optimal performance. iSys Media provides the qualified media for the iTerra IJ1800. These consumables provide the best quality output as well as greater consistency print after print compared to other media.

Paper Width Options

Finally a color printer that takes standard API Well Log paper widths but also allows you to print on media up to 18" wide. You choose!

The iTerra IJ1800 accommodates paper widths of 8.75", 9", 12", 14" and 18". There are no limitations to report size therefore you can view more data and/or create presentation size reports. You can use standard markers or pens on printouts of iSys qualified paper for the purpose of taking notes.

Ease of Use

The iTerra IJ1800 printer has everything you need to start plotting. It comes standard with 3 interfaces (10/100 Network, USB or Centronics), 4 color ink cartridges, a pedestal and a printer driver. Just load the software, add paper and the ink cartridges then send your well log file to the printer. Let the IJ1800 do the rest. You never have to adjust top of form manually and your output will always be in a nice neat stack.

Full Color

The iTerra IJ1800 printer comes standard with 4 large capacity ink cartridges all monitored through the front panel so you don't have to guess your ink levels. The black ink cartridge contains 69ml and the 3 separate color ink cartridges (cyan, magenta and yellow) are 28ml each. When you replace one ink cartridge, you don't have to replace them all.

Monitor Software

The IJ1800 has monitor software that will test connectivity between the network and the printer, monitor the ink levels as well as the printer status. The software is used for cleaning pens, head alignments as well as media calibration.

Automatic Top of Form

User intervention is minimal. The iSys qualified fanfold paper has a top of form mark that ensures the printer starts each print job at the top of a perforation every time. This enables you to load once and print many.

iTerra IJ1800 *print quality and flexibility*

18" Wide Format, Enhanced Color

SPECIFICATIONS

PRINT TECHNOLOGY	Color Inkjet
PLOTTER CARRIAGE WIDTH	18"
MAXIMUM PLOT WIDTH	17.6"
PRINT RESOLUTION	300 dpi
MAXIMUM BYTES PER SCAN	n/a
MAXIMUM PLOT SPEED	0.64" per second (color)
CONSUMABLES	Fanfold Paper, Ink Cartridges, Printheads
SHEET SIZES	n/a
CONNECTIVITY INTERFACES	STANDARD - Centronics®, USB 10/100 Network
WARRANTY	6 Months
DRIVERS	Windows 2000, XP
OPTIONS	n/a
DATA FORMATS	PCL3GUI
POWER REQUIREMENTS:	100V - 240V 47-63Hz 2 Amps
DESKTOP MEASUREMENTS (W x D x H)	n/a
PEDESTAL MEASUREMENTS (W x D x H)	28" x 36" x 39" (71.1cm x 91.4cm x 99.1cm)
WEIGHT:	100lbs (45.4kg) Net
OPERATING TEMPERATURE	50°F to 90°F (10°C to 32°C)
OPERATING HUMIDITY	25% to 75% RH non-condensing
CERTIFICATIONS	FCC Class A, CE

FEATURES:	BENEFITS:
Automatic Top of Form	Jobs consistently start on the correct fanfold sheet
Continuous media feed	Non-stop imaging
Ink level display	User is aware of ink levels at all times
Ink Cartridge Replacements	Enables your job to continue to plot right where it left off
Interpretation Notes	Use standard markers or pens on printouts of iSys qualified paper

We Design, Develop & Deliver

iSys - The Imaging Systems Group Inc. is a company with big output. We have been designing, developing and manufacturing printers and plotters for over 20 years.

iSys supplies printers and plotters to companies requiring outputs for:

Seismic	Engineering	Mapping
Well Logging	CAD	Aerial Photography
Mining	Artwork	Blue Prints
Sidescan Sonar	Site Design	Screen Printing
Newsprint	Facility Management	
Editorial		

iSys is built upon solid business practices, technical expertise and commitment to excellence. The iSys brand has become a recognized and established market leader worldwide.

iSys is continually developing new features and new products. Our research and development begins with ideas and concepts from a blend of our own vision and input from you the customer. Our relationship with our customers continues through the development and manufacturing phases, creating a product that contributes to our customer's increased productivity and efficiency.
